Prerequisite: None

---

Note: It is the student's responsibility to be familiar with the information contained in the Course Outline and to clarify any areas of concern with the facilitator.

**Course Description:**

This course probes the issues relating to individuals with both mild to chronic and short to long-term mental health and illness challenges. Areas explored include Schizophrenia, Cognitive and Personality Disorders, Stress and Adjustment Disorders, Mood and Dissociative Disorders and Addiction. Interventions such as behavior modification, medication and other related topics will also be discussed

**Learning Outcomes:**

As a result of active participation in these sessions, a student can expect to:

- Define mental health, the factors that influence it.
- Explain the various biological, psycho-social, and psycho-cultural factors that cause abnormal behaviour.
- Compare and contrast the major mental illnesses and their treatments.
- Identify mental health resources in Calgary and area.
- Discuss the factors involved in alcohol and drug abuse and their treatments.
- Critically assess the contemporary and legal issues in mental health and addiction.

**Course Format:**

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.

### **Oral Presentation**

**Due date: Class**

**Weight: 10%**

Each student will make a 10- to 15-minute PowerPoint presentation on the salient points of his or her research assignment or any relevant topic pre-approved by the facilitator and be prepared to respond to questions from class members. Students will be evaluated according to the appended Oral Presentation Rubric.

### **Final Exam**

**Due Date: Class 10**

**Weight: 30%**

Students will be required to write a final exam consisting of multiple-choice questions covering the content of classroom learning and assigned text and other readings.
