Prerequisite: None

Note: It is the student's responsibility to be familiar with the information contained in the Course Outline and to clarify any areas of concern with the facilitator.

Course Description:

This course focuses on becoming a professional. To choose to enter a profession is to take on a distinct and important set of responsibilities. The course is designed to probe into and investigate legal, personal, and societal values, ethics, morals and ideologies that impact on being a professional. The student will learn how their personal ethics come into play in their success as a professional. The course will pose many ethical issues and dilemmas for the student to consider as they evolve into a professional.

Learning Outcomes:

As a result of active participation in these sessions, a student can expect to:

- Critically analyze what it means to be a good human service professional.
- Critically analyze professional ethics issues and resolve issues using ideas and techniques learned from this course.
- Apply, analyze, and evaluate the effectiveness of various theories of moral reasoning and behaviour in ethical situations.
- Develop a personal ethical model of professional-client relationship and evaluate it for suitability and appropriateness.
- Analyze and critique the moral issues surrounding lying and truth telling.
- Explore and determine a position on the ethical obligation of a professional in the protection of private information and the boundaries of confidentiality.
- Apply and critically analyze the principles of justice as they apply to an individual and to the professional's obligation to society.
- Explore the implications of conflict of interest in professional life.

Course Format:

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.
