Class Time: Tue. (5:30pm – 9:30pm) Sat. 8:30 AM – 12:30 PM (Sat.)

Room: 805-114

Credit: 3

Prerequisite: None

Note: It is the student's responsibility to be familiar with the information contained in the Course Outline and to clarify any areas of concern with the facilitator.

Course Description:

This course will serve as a practical introduction to the field of sociology. Students will be able to identify and explain the significance of some of the phenomena, methods, and theories of sociology; differentiate between sociological and other questions, theories, and approaches; and interpret a variety of data arrays in order to assess and make sociological arguments. Related theory, research and analysis related to the field will be examined.

Learning Outcomes:

As a result of active participation in these sessions, a student can expect to:

- Identify and explain the significance of some of the phenomena, methods, and theories of sociology.
- Differentiate between sociological and other questions, theories, and approaches.
- Explain in your own words some of the key concepts of sociology.
- Interpret a variety of data arrays in order to assess and make sociological arguments.
- Contribute to a group analysis of "both sides" or opposing viewpoints on a controversial issue.
- Compose and present an individual position paper on a controversial issue using course materials and concepts.
- Apply the concepts, theories, and principles learned from this course to hypothetical situations.
- Communicate information learned from this course to both specialist and non-specialist audiences.

Course Format:

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.

How well do you feel that Canadian schools presently provide this function? Is this ever likely to be a major function of schooling? Should it be? Discuss. (Based on Chapter 14)
2. How do your life experiences differ from that of your older and younger siblings or your parents? Have demographic factors determined these differences? |
