Course Description:

This course is designed to help students in understanding individuals with behavioral and/or emotional differences. Emphasis is on a systematic approach in order to observe, to explain, predict and improve the well-being of the individuals you will be working with. You will come to understand and use Applied Behavior Analysis Procedure to help students to understand and manage their behavior.

Learning Outcomes:

As a result of active participation in these sessions, a student can expect to:

- Explain and utilize applied behavioral analysis theory.
- Understand the difference between objective and subjective goals and observations.
- Be able to identify and explain applied behavioral analysis in practice.
- Understand the difference between objective and subjective goals while applying observation theories.
- Be able to write behavioral objectives as intended outcomes.
- Select, explain, and follow through on systems of data collection as ongoing measurements of behavior.
- Demonstrate proper observation skills.
- Demonstrate the proper writing of different types of observation reports.
- Understand and utilize a behavioral support plan.
- Identify the components of a behavioral objective.
- Understand the concepts of stimulus control and shaping to teach students academic and social behaviors.
- Understand and demonstrate consequence techniques that increase and decrease a desired behavioral outcome.
- Use a step by step approach to aid your future students in behavioral self-management.
- Gain appropriate skills in working in a team, and in a positive and proactive manner.

Course Format:

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.

How to avoid plagiarism?

The simplest way to avoid plagiarism is to reference any source properly (using both in-text, parenthetical citations in the body of your assignment and a "References" page at the end. While it is commonplace to build upon the knowledge of others, it is necessary to clearly state the sources and foundations of that knowledge. Referencing must conform to the APA referencing formats outlined in the "Citations" resource book.
