Facilitator: Anthony Appleby

Email: Anthony.appleby@columbia.ab.ca

Class Time: 8:30 AM to 12:30 PM Mon. / Wed.

Room: 805-119

Credit: 3.0

Prerequisite: None

Note: It is the student's responsibility to be familiar with the information contained in the Course Outline and to clarify any areas of concern with the facilitator.

Course Description:

This course allows students to learn and apply core critical thinking, reading, and writing skills. Students will practice various forms of academic writing, including reflective journaling, summary and paraphrasing, case study analysis, and a problem-solving proposal. Throughout the course, students will learn to edit and revise their own work, as well as the work of their peers and will collaborate through individual and group activities. Prerequisite: None.

Learning Outcomes:

As a result of active participation in these sessions, students can expect to:

- Demonstrate a critical examination of ideas through close reading, inquiry, divergent thinking, evaluation of evidence and interpretation, as well as an understanding of rhetoric, reason, logic, and word usage.
- Use a variety of strategies for reading and engaging with a range of material.
- Distinguish between fact and opinion.
- Analyze and articulate the reasoning behind an argument.
- Integrate evidence gathered from experience, reading, observations, and/or other forms of research into their own writing in a way that begins to complicate their own understanding.
- Use an academic documentation style.
- Articulate the rhetorical choices they have made, illustrating their awareness of a writer's relationship to the subject, context, purpose, and audience.
- Apply strategies for generating ideas for writing, for planning and organizing material, for identifying purpose and audience, and for revising intentionally.
- Provide appropriate, engaged feedback to peers throughout the writing process.

Course Format:

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.

Daily Tests

Due Date: At the beginning of each class from classes 1 through 10

Weight: 30%

Students will be expected to read the assigned chapters in the text and should be prepared to write a graded test based on these reading assignments. The questions will be a combination of multiple choice and short answer.

Problem Solving Proposal

Due Date: Class 10

Weight: 35%

This assignment requires you to identify a problem and propose a solution to a person who has the power to implement the solution. Students should follow the "Arguing for Change" steps outlined in Chapter 16 (pgs. 464-465)

Step 1: Begin brainstorming a topic by identifying problems that you've encountered within a school, a workplace, as a volunteer, as a customer or client, or potential employee.

Step 2: Narrow the list to problems that are rhetorical, i.e., that may be addressed via writing and speaking.

Step 3: Narrow the list further by eliminating any problems that could only be resolved through a political process (e.g., lowering taxes or raising the minimum wage).

Step 4: Now think about ideas for solving these problems: what is your objective, what is the specific action (i.e., solution) that you recommend? What are the anticipated outcomes of that action? Consider other options- what are the advantages and disadvantages of these other options?

Step 5: Make a claim advocating for a specific change or course of action. State your solution and conclude with a call for action. How can you most persuasively justify the wisdom and practicality of your solution? Ensure you have done your background research and included any necessary images, tables, or graphics that will support your claim.

Step 6: Write, read, write, re-write, get feedback, and revise again.

Writing Assignment Expectations (Problem Solving Proposal):

- **Objective:** The objective of this writing assignment is to critically apply concepts, ideas, and procedures to facilitate higher level learning. The assignments are designed so students can demonstrate the depth of knowledge related to the course content.
- **Focus:** This assignment is designed to apply knowledge from the chapters and class discussions.
- **Format:** This assignment should be double-spaced. Do not include title pages. Include your name at the top of each page. Each entry should be a minimum of 750 words and a maximum of 1000 words in length and should follow APA guidelines. Students will be evaluated according to the attached rubric: Problem Solving Proposal Rubric.

How to avoid plagiarism?

The simplest way to avoid plagiarism is to reference any source properly (using both in-text, parenthetical citations in the body of your assignment and a "References" page at the end. While it is commonplace to build upon the knowledge of others, it is necessary to clearly state the sources and foundations of that knowledge. Referencing must conform to the APA referencing formats outlined in the "Citations" resource book.

Reflective Journal Entries (Class 3, Class 6, and Class 8)

Weight: 35%

Due Date: Class 10

During the course students will be learning and experiencing many new things. Students should follow the steps to writing a reflection outlined in Chapter 10.

Journal Entry 1: Should cover classes 1 and 2 and should speak to your initial impressions/expectations/fears about the course.

Journal Entry 2: Should cover classes 3, 4 and 5 and should focus on the experience to date. Some key points to consider include speaking to the class content, any assumptions that were challenged, and what you have learned from the readings.

Journal Entry 3: Should cover classes 6 and 7 and should focus on reflecting back on what you have you gained (educationally and personally) through this course and how this course will help you reach your educational goals.
