Course Format:

The format of this course mirrors the expectations of the professional program you are about to enter.

Each class will begin with students submitting 3 questions from the assigned homework reading. A group discussion will take place. This will be followed by a test to assess knowledge acquisition. The remainder of the class will provide an in-depth focus related to the subject matter.

The course emphasizes pre-class homework, participation in interactive classes, and post-class reflection and review. You are expected to take an active part in class discussions and take responsibility for your own learning. You are expected to be a positive and co-operative team member. The “instructor’s” role is to facilitate your learning. You’re enthusiastic and positive approach in the classroom will create an atmosphere that will help students develop the knowledge, skills and attitudes that are needed for success.

How you behave in class will, to a large extent, mirror your behavior in the world of work. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, there is a high correlation that you will do the same at work. The course format provides you with an opportunity to do this; it enables you to practice thinking and acting like a successful professional. A high level of professional conduct on the part of each student is expected.

Each student will write a final exam on the last day of class that encompasses the readings and information studied during the course. Test and final exam marks will be submitted to the program chair.
