Semester Dates: March 16, 2015 – April 18, 2015

Facilitator: Peter Cople; D/Chief (Ret.)

Email: pjcopple@gmail.com

Class Time: 1:00 PM – 5:00 PM (Mon/Wed)

Room: 805-114

Credit: 3

Prerequisite: CRIM 155

Note: It is the student's responsibility to be familiar with the information contained in the Course Outline and to clarify any areas of concern with the facilitator.

Course Description:

In this course, students will learn about the different categories of problems faced by at-risk youth, as well as about appropriate interventions on how to deal with these problems. A conceptual framework for these categories of problems will be presented which includes discussions of all levels of ecology of problem development and resolution as it relates to youth at-risk issues. A wide range of practical educational, psychological, and counseling interventions for the prevention and treatment of problems will also be investigated in detail in this course. Prerequisite: CRIM 155

Learning Outcomes:

As a result of active participation in these sessions, a student can expect to:

- Describe the ecology of problems experienced by at-risk youth in our communities and society in general.
- Explain the environmental and societal factors that contribute to at-risk youth, e.g. families, schools, and communities.
- Identify and explain specific interventions that can be used to deal with various at-risk categories.
- Explain a comprehensive prevention, early intervention, treatment framework as presented in this text.
- Compare and contrast the various intervention strategies used for different individuals, groups, and situations.
- Critically evaluate the current issues and trends in youth at-risk professional practice.

Course Format:

This course uses a variety of teaching/learning methods including discussion, personal reflection, experiential exercises, student presentations, role-plays, group activities and especially case studies. Our faculty aims to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in class discussions and take responsibility for your own learning. Be a positive and co-operative team member. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will come to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will, to a large extent, mirror your conduct in society and your future work site. For example, if you have a tendency to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.
