

# PROFESSIONAL OATH

---

I, by virtue of my knowledge, skills, attitudes, and behaviour, undertake to perform my duties and responsibilities in the workplace in a highly professional manner. I will be organized, manage my time efficiently, dress professionally, and take utmost pride in my work. As a team member, I will listen patiently to others, communicate effectively, and help others in a positive and respectful manner to find more creative and innovative ways to solve problems and make or recommend effective decisions resulting in better quality outcomes.

I will take the utmost consideration in every decision I make and action I take in the best interest of those I am responsible to assist and serve, both within the organization and outside it. This will include fellow members of the organization, suppliers, customers, clients, patients, and students. I will demonstrate genuine regard and respect for all members of society and the environment.

I will continue to acquire new knowledge and skills as a professional and will seek support and assistance from others when necessary in order to make sound and effective decisions based on objective data. My reputation as a professional shall be based on honest, law-abiding, ethical, and moral decisions and actions.

By signing this, I commit to adopting the 150+ Professional Behaviors identified by Columbia College (***see [columbia.ca/success](http://columbia.ca/success)***) and using these behaviours as a foundation to inspire trust and respect in my professional and personal life. This commitment extends beyond specific qualifications or affiliations to embrace a universal dedication to professionalism and excellence.
