Prerequisite: None

Note: It is the student's responsibility to be familiar with the information contained in the Course Outline and to clarify any areas of concern with the facilitator.

Course Description:

This course allows students to learn and apply core critical thinking, reading, and writing skills. Students will practice various forms of academic writing, including reflective journaling, summary and paraphrasing, case study analysis, and a problem-solving proposal. Throughout the course, students will learn to edit and revise their own work, as well as the work of their peers and will collaborate through individual and group activities. Prerequisite: None.

Learning Outcomes:

As a result of active participation in these sessions, students can expect to:

- Demonstrate a critical examination of ideas through close reading, inquiry, divergent thinking, evaluation of evidence and interpretation, as well as an understanding of rhetoric, reason, logic, and word usage.
- Use a variety of strategies for reading and engaging with a range of material.
- Distinguish between fact and opinion.
- Analyze and articulate the reasoning behind an argument.
- Integrate evidence gathered from experience, reading, observations, and/or other forms of research into their own writing in a way that begins to complicate their own understanding.
- Use an academic documentation style.
- Articulate the rhetorical choices they have made, illustrating their awareness of a writer's relationship to the subject, context, purpose, and audience.
- Apply strategies for generating ideas for writing, for planning and organizing material, for identifying purpose and audience, and for revising intentionally.
- Provide appropriate, engaged feedback to peers throughout the writing process.

Course Format:

This 45-hour online course uses a variety of online teaching/learning methods including discussion, personal reflection, experiential exercises, group activities and case studies. Our faculty aim to create a learning environment where the learner is actively engaged in inquiry, critical thinking and problem solving. The online classroom provides you with a place where you can learn with and from others in a cooperative and collaborative manner.

You are expected to take a very active part in online class discussions (synchronous and asynchronous) and take responsibility for your own learning. Being a positive and co-operative team member will add to your success. Columbia College uses a facilitation model of instruction where the facilitator's role is to facilitate your learning. The expectation is that you will log in to class prepared with pre-class homework completed. Your facilitator will engage you in activities that are based on your completed homework and readings. Your enthusiastic and positive approach in the online classroom will create an atmosphere that will help every student develop the knowledge, skills and attitudes that are needed for success.

How you conduct yourself in our classes will largely mirror your conduct in society and your future work site. For example, if you tend to ask questions, challenge the ideas of others in a respectful manner, draw out the best from your colleagues, and encourage both group development and task accomplishment in this class, it is likely you will do the same at work. A high level of student involvement and developing professionalism is expected in the classroom as you work towards your goal.

Daily Tests

Due Date: Available on McGraw-Hill Connect (link on Moodle/Portal) on the day of each class from classes 1 through 9

Weight: 25%

Students are expected to have read the assigned chapters in the text and other assigned readings and be prepared to write a graded test based on these reading assignments.

- Tests are open in McGraw-Hill Connect from 8:30 AM on the day of the scheduled class. to 11:59 PM the following day.
- There is one attempt and a 30-minute time limit on each test.

Reflective Journals

Due Dates: Class 2 and Class 9

Weight: 20%

During the course, students will be learning and experiencing many new things. Students should follow the steps to writing a reflection outlined by facilitator.

Journal Entry 1: The topics you write about should cover material your impressions of classes 1 and 2 and should speak to your initial /expectations/ fears about the course and the program you are starting.

Journal Entry 2: Should cover some insights gained during the course about learning strategies that work for you and areas of challenge you have identified. Some key points to consider include speaking to the class content, any assumptions or beliefs that were challenged through the course and discussions, and what you have learned from the readings/discussions that will be applicable for your learning in the program or in your future career path.

Objective:

- The objective of this writing assignment is to critically apply concepts, ideas, and procedures to facilitate higher level learning. The assignments are designed so students can demonstrate the depth of knowledge related to the course content.

Focus: This assignment is designed to apply knowledge from the chapters and class discussions.

Format: This assignment should be double-spaced. Include your name at the top of the first page. 12-point Calibri font is preferred. Each entry should be a minimum of 250 words and a maximum of 350 words in length and should follow APA7 guidelines. Students will be evaluated according to the attached rubric: **Reflective Journal Rubric**.

How to avoid plagiarism: The simplest way to avoid plagiarism is to reference any source properly (using both in-text, parenthetical citations in the body of your assignment and a "References" page at the end. While it is commonplace to build upon the knowledge of others, it is necessary to clearly state the sources and foundations of that knowledge. Referencing must conform to the APA7 referencing formats outlined in your ENGL110-1 texts (Tab 7).

Forum Responses
Due Dates: Class 4
Weight: 10%

Online Moodle discussion forums provide opportunities to exchange knowledge. Students are expected to demonstrate their understanding of class readings by posting thoughtful and succinct responses to questions posed by the instructor.

Student responses should demonstrate:

- reflection of the course material
- connections to experiences
- previous or current information and be relevant to the discussion.

Student responses should further the discussion by demonstrating critical thinking, posting meaningful responses to peers' work and adding new perspective and ideas.

Format: Each entry should be a minimum of 150 words and a maximum of 250 words in length. Students will be evaluated according to the attached rubric: **Discussion Forum Rubric**

Homework
Due Date: Classes 5, 6 & 7
Weight: 15%

- APA7 homework – to be distributed by facilitator.
- Academic Research Activity
- Problem Solving Proposal Outline Due- Facilitator will provide an outline for final assignment

Problem Solving Proposal

Due Date: Class 10

Weight: 30%

This assignment requires you to identify a problem and propose a solution to a person who has the potential to implement the solution.

Students can follow the planning process below as a guide.

Step 1: Begin brainstorming a topic by identifying problems that you've encountered within a school, a workplace, as a volunteer, as a customer or client, or potential employee.

Step 2: Narrow the list to problems that are rhetorical, i.e., that may be addressed via writing and speaking.

Step 3: Narrow the list further by eliminating any problems that could only be resolved through a political process (e.g., lowering taxes or raising the minimum wage).

Step 4: Now think about ideas for solving these problems: what is your objective, what is the specific action (i.e., solution) that you recommend? What are the anticipated outcomes of that action? Consider other options- what are the advantages and disadvantages of these other options?

Step 5: Make a claim advocating for a specific change or course of action. State your solution and conclude with a call for action. How can you most persuasively justify the wisdom and practicality of your solution? Ensure you have done your background research and included any necessary images, tables, or graphics that will support your claim.

Step 6: Write, read, edit, get feedback, and submit your best copy.
